# Hybrid Cauliflower

## Snow Crown

<b>DESCRIPTION:</b>	Early maturing with a white, semi-dome shape. Head weight is approximately 2 pounds.
<b>MATURITY:</b>	70 days after transplanting
<b>CULTURAL CHARACTERISTICS:</b>	Good uniformity and density, Snow Crown is tolerant to heat and cold temperatures giving it a long period for harvesting.
<b>ADAPTABILITY:</b>	Coastal California

### FEATURES

- Good uniformity
- Good head weight
- Good dome shape
- Tolerant to heat and cold stress

### BENEFITS

- Better pack
- No problems making weight
- Better pack
- Wide range of adaptability

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions. Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions.
