HYBRID ONION MOUNTAINEER
 (T-422)

DESCRIPTION: Early/mid, long day, Northeastern type

MATURITY: Early maturing (95-100 days)

COMPARABLE VARIETIES: Millennium, Barrage, and Hamlet

CULTURAL CHARACTERISTICS: This early/mid Northeastern long-day onion is comparable to Millennium, Barrage and Hamlet. Bulbs are flattened globe in shape and have excellent skin quality. The outstanding features to this variety are its earliness & storability. With thinner necks, this onion cures down quickly for excellent storage results. Mountaineer will store slightly longer than Frontier.

MARKETS:

ADAPTABILITY: New York, Canada, and Midwest

FEATURES

- Nice size/early
- Firm bulbs
- Excellent skin retention
- Thin necks

BENEFITS

- Good yields
- Good storage
- High quality, good pack out
- Makes size with great shape

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions.

Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions.
